NAME

/etc/ClusterTools2/ – configuration for ClusterTools2 commands

DESCRIPTION

/etc/ClusterTools2/ contains configuration for ClusterTools2 commands. For each command there is one config file. The config file is named exactly as the command itself. Each config file contains a set of variables, filled with one or more lines of values.

SYNTAX

Each variable name should start at the first character of a line. Values are assigend with an equal sign "=". The config files can contain comments, masked with an hash "#" as first character of the line.
See individual manual pages for command specific formats.

EXAMPLES
FILES

/etc/ClusterTools2/

the directory with various configuration files.

/usr/sbin/

the directory with various program files (mostly shell scripts).

BUGS

Feedback is welcome, please use the project page at
